

Product Summary

With its ease of use and mess-free installation, the [Field Splice Kit](#) makes outdoor electrical connections a breeze. Featuring its NextSeal™ technology and simple inline 3-wire design, you can affectively create a water tight seal with minimal effort across a large variety of applications.

Technical Details

Environmental

The Field Splice Kit is [IP68 compliant](#) and utilizes NextSeal™ technology, making it suitable for underground installation with all weather durability.

The Field Splice Kit is approved for installations in temperatures ranging from [-20°F to 150°F](#)

Connection

3 pole removable connector

- < 3mΩ resistance
- 1000 MΩ insulation resistance
- Rated current of up to 3A
- Rated voltage of up to 48V

Cable

Technical Summary

Environmental IP68, Waterproof
Suitable for underground applications

Temperature -20°F to 150°F

Connection 3-pole inline splice connection
< 3mΩ resistance
1000 MΩ insulation resistance
Rated current of up to 3A
Rated voltage of up to 48V

Cable Designed for 2 or 3-wire insulated cables
Min 3mm Max 4.5mm cable diameter
Compatible with AWG 18-24
